

IT HAS COME! MUNSON ADDITION

BETTER KNOWN AS FOX COULEE

The Greatest Opportunity Ever Presented to the Investing Public of Edmonton

A glance at the key plan below will show that Munson Addition is a bona fide proposition. The C.N.R. Townsite is within one block of this property and their prices range from \$700 to \$1,500. Compare these with ours!

Munson is the Divisional Point on the Vegreville to Calgary extension as well as being the Junction of the Goose Lake extension from Saskatoon. The third line of the C.N.R. from Regina to Calgary will cross the Red Deer line at this point also. This will make Munson the greatest railway centre of all the new towns on the different lines of railway.

Munson is right in the heart of one of the best Agricultural Districts in the Province. Every quarter section for miles around is homesteaded and there is no land for the speculators or large corporations to acquire, thereby retarding the development of the country and consequently the growth of the town as has been the case at other points.

Munson has two Banks, two Drug Stores, six General Stores, three Lumber Yards, two Livery barns, two restaurants, and two Hotels under course of construction. We will offer Munson addition for sale on Monday, the 21st instant. Sale opens at 10 o'clock a.m. Prices from \$75.00 up. Terms 1-4 Cash, Balance in 6, 12 and 18 months. Don't hesitate! Be sure and get in on the ground floor at first prices.

ALBERTA'S TIMBER RESOURCES MUST BE PROTECTED

On the question of conservation the speech made by James K. Cornwall in the legislature of Alberta is worthy of careful attention from every citizen of this province who holds the timber to be worth considering.

Mr. Cornwall speaks the plain unvarnished truth when he says that more timber has been destroyed by fire within recent years than would have paid the province's debt and built most of its railways.

Alberta has a timber belt more than four hundred miles from north to south and extending from east to west across almost the entire width of the province. As it stands today it is worth counting millions. Unprotected, it will be destroyed. The department of interior at Ottawa, by failing to protect this timber, is saddling posterity with a burden that will be hard to bear and robbing the province of one of its greatest sources of wealth.

One of the greatest arguments in favor of a railway to the north is that by connecting with the waterways this timber area will be opened up, and the prairie will be given an opportunity to get lumber which will not have paid the cost of a haul over the mountains or from the Lake of the Woods.

Alberta is entitled to have her resources properly conserved and Alberta is entitled to have a railway which will open these resources to the benefit of the people of the country.

Alberta has not the power to compel the department of interior to conserve the timber of the province, but it has the right to go to the dominion with its demand that these resources be turned over to the province and it has the right to build the railway herself.

The railway to the north must be built and the timber of the country must be protected from the ravages of fire if this province is to be saved from a situation similar to that which has already overtaken many of the eastern states, where a country which was no more than a generation ago clothed in the most glorious growth of timber which nature could provide is today importing lumber at enormous cost from miles beyond the borders of the republic.

JUSTIFICATION FOR ASQUITH

With an election now only a few days away, the house of lords emulates Davy Crockett's coon; it decides to come down.

Having furnished every different brand of opposition to its reformation, from straight presumption and contempt for the house of commons to whining solicitude for such a cherished institution, the lords now offer to reform themselves by reducing the number of hereditary peers one half, allowing the appointment of the other half from among men who have rendered distinguished public service to the nation.

Aside from the fact that inasmuch as the lords refused to allow anyone else to reform them it is scarcely likely that they will do much toward reforming themselves, the reform suggested is one which will strike Canadians as an unpolished pleasanter.

Canada has a house appointed in the way in which the peers suggest one half of their number should be appointed. In Canada it is called the Senate. Its members have no hereditary claim to office and all are supposed to have been appointed on account of their distinguished public service.

When the peers themselves admit that their branch of the government of Great Britain could be improved by substituting for it something like the Canadian senate it becomes pretty clear that the determination of the Liberal government to abolish the house of lords altogether has plenty of justification.

FRENCH'S REPORT ON THE MILITIA

General French, in his report on the Canadian militia, practically bears out all that the critics of the militia system have been contending for years.

In brief, General French says that the citizen soldiery of Canada is composed of men who, taken as individuals, have few equals in the world, but that the militia as a whole is poorly organized and the groups very poorly placed.

What General French says in this respect is undoubtedly true, but there is another point which the general was not asked to report upon, and which the fact that French is himself a soldier precludes his ever being able to appreciate.

The point is that Canada is spending more than eight million of good money every year for the maintenance of the militia, while other departments which have to do with the nation's success along the paths of peace are starved.

Canada is a rich nation, growing richer, but one of the greatest reasons for her prosperity is the fact that she has not squandered her resources in the pursuit of war or the maintenance of a non-productive standing army.

Canada now spends eight per cent. of her revenue on the militia. The same amount of money turned to the department of agriculture would accomplish more for the general good of Canada than a standing army of a million men.

JUST PARAGRAPHS

A bill is to be introduced in the Ontario legislature this session licensing barbers. This looks like giving the tonsorialists a little the best of it. Patrons have sufficient difficulty to say "No" to the barber now, but when he becomes a certified practitioner and prescribes those shampoos, massages and hair restores it will require great force of character to keep out of the bankruptcy court.

In view of the fact that the Builders' Exchange decided some time ago not to recognize the plasterers and that the plasterers have now decided not to recognize the Builders' Exchange, the parties will probably have to be introduced every morning before going to work.

According to a recent judgment of the English courts labor unions cannot use their funds to pay the expenses of labor members of parliament. Brewers and distillers, however, still have the inalienable right of spending their money for this or any other political purpose they see fit.

When the chances of Democratic success in United States commenced to go up the price of trust commodities commenced to come down. And yet the trusts say that the tariff is not a factor in the increased cost of living.

CORRESPONDENCE

CAN THE BAKERS TELL HIM?
Edmonton, Nov. 15.
Editor Daily Capital:
Dear Sir—Will you kindly tell me if I am informed correctly, when I say that bread sold in Edmonton should weigh one and a half pounds. If I am correct, then it is high time something was done to compel the bakers to comply with the law. Several loaves which I have bought from stores on the main street, from six ounces light. I presume the bakers make the price to conform to the weight. There is too much of this short weight and short measure going on in this city. It is time the public were protected.
I am yours truly,
S. M. WIPPLE,
Jasper East.

AT THE ORPHEUM

Mrs. Katherine Boland Clements, daughter of one of St. Louis first families, and wife of Dr. J. R. Clements, has been declared the winner of the scenario contest and the \$100 offered by The St. Louis Times for the best moving picture play. The judges of the contest awarded the prize to Mrs. Clements over several hundred contestants. The Independent Moving Picture Company of New York will produce the play immediately.

"The Doctor" is the title of the successful scenario.
This magnificent production will be reproduced at the Orpheum Theatre on Wednesday and Thursday of this week. It deals with an incident of the Spanish-American War in Cuba and will make all patriotic Americans cheer themselves hoarse. The story is built around two men who are the exact counterpart of each other, and the dramatic situations which arise may be readily imagined. The Orpheum are fortunate in getting some splendid subjects lately and this is one of the best.

STRATHCONA LOCAL NOTES

A plank sidewalk has been constructed down the hill from Sask. avenue to Pleasant street, which will fill a long-felt requirement in that particular locality.

Rev. Dr. Moore and Rev. Rochester are attending the meeting of the Lord's Day Alliance in Red Deer. Dr. Moore is shortly to become Temperance and Moral Reform representative for the Methodist Church in Canada.

Rev. Rochester will succeed him as chief secretary for the Lord's Day Alliance. Two new men will take up Rev. Rochester's present work as Western secretary of the L. D. A.

Mr. Lohr is proceeding with the erection of a substantial frame residence on Main street north. The comfortable two-story dwelling built by him several months ago on Third avenue north has been sold to Mr. Scott.

The contractors have finished making improvements and alterations to the local immigration hall, with the result that better and more comfortable accommodation is now offered incoming settlers here than at any time in the past. \$2,200 were spent last year in important improvements to the building and this amount was duplicated in this year's appropriation. Hundreds of skaters from Edmonton and Strathcona have enjoyed the skating afforded on McKinnis's Lake during the past two weeks of brilliant moonlight nights. The light snowfall has interfered to some extent with the pastime. It is expected that the covered rink will be opened in a few days for skating.

CALEDONIAN SOCIETY

The Caledonian Society will hold their regular monthly dance in the Separate School Hall on Thursday 24th inst., at 8 p.m. The Callic dances are now the best patronized and most enjoyable dances in town, everybody is made welcome and a good time is assured, refreshments will be served as usual, and Sloan's Orchestra will provide the music.

DREDGING PLANT ON SOUTH SIDE

Strathcona Protests Against Removal of Gravel Which Protects River Bank

Extensive preparations have been practically completed by the Huffer dredging plant, for opening operations on this side of the river, near the city power house. Trestles, tracks and dumps have been erected and work is expected to start in a few days, the dredge being now engaged in clearing a channel some distance out from the bank. The grouting machinery will be operated by two large electric motors recently installed by the city department. The council has protested to the legislature against the dredgers removing a large sand bar some distance in the river from this side, which affords protection to the bank near the power plant. It is not known what action will be taken in the matter. The firm has the contract for supplying gravel to the high level bridge builders.

STRATHCONA CITIZENS TALK TO COUNCIL

Declare Amendments to Charter
Asked by Council Do Not In-
clude Amalgamation.

STRATHCONA COUNCIL

Question of Sunday Cars is Also
Discussed—Warm Meeting
Held.

(By Our Own Correspondent)

Strathcona, Nov. 23.—The presence of a deputation of amalgamation partisans at the council meeting Tuesday night proved productive of a rather brilliant display of fireworks. The deputation consisting of about one dozen ratepayers evidently considered that the council committee appointed recently to deal with the submission of the proposed city charter amendments to the Legislature, were moving to rather forestall the petition handed in one week ago by a large number of ratepayers praying the council to obtain legislation which would enable Strathcona to affiliate with Edmonton when the time seemed opportune. This insinuation brought emphatic denials and explanation from some members of the council which were taken up in subsequent discussion with varying degrees of heat.

In the absence of Mayor Duggan the chair was occupied by Ald. Bush. The only other absentee from the council was Ald. Richards. Ald. Leckum made his first appearance at the meeting for several weeks, he having been rather seriously ill for some time. When the regular order of business was suspended to hear deputations Mr. A. E. Austin rose as spokesman for the assembly. He wanted information regarding the proposed amendments to the Strathcona charter which has now received the first reading before the legislature. He understood that the clause relating to any annexation of adjoining districts to the municipality requires a two-thirds majority vote to become an act. It would also deter non-resident ratepayers from voting on this measure.

Acting mayor Bush said this was only a slight revision of the present charter clause and requested secretary Cox to read the clause in question. Mr. J. Daly had agreed to say on the subject apparently correcting the views of those present when he charged some of the council members with being prejudiced against any amalgamation movement and unwilling to consider the question when brought up by the ratepayers. He thought the council acted in an arbitrary manner in sending such an amendment for ratification to the legislators in the face of a petition asking that steps be taken immediately to make amalgamation possible when the people wished.

Ald. Tipton's Firm Stand
Ald. Tipton took a hand in the discussion at this juncture and held his position very plainly in regard to amalgamation. He held that it was due the constituents of any alderman to know exactly where their representative stood on a public question by perusing the troublesome by-law clause he noticed that it referred to annexation of only suburban properties and not to an amalgamation with another city. He thought that special legislation was required to secure this and the ratepayers had already asked for such legislation. If unions demanded by the majority of the people it should be the business of the council to carry out their wishes. No personal opinions should stand in the way. He considered it clearly an injustice for non-resident ratepayers to be denied the privilege of registering their vote on important questions. There should be no taxation without representation.

Ald. Calder questioned the right of the alderman taking a part in the discussion while deputations were being heard, and moved that a return be made to the regular order of business if there was nothing further to be said by the visiting ratepayers. This brought out a severe cross fire between members of the deputation and some of the aldermen. Chairman Bush said he was sure all members of the council were anxious to hear the expression of opinions from ratepayers but it was departing from the order of administrative business to allow aldermen to state their position during the hearing of deputations. Ald. Tipton closed with the explanation that he was for amalgamation if such a move would be for the betterment of the city as he frankly believed it would. He wanted his position made clear on that point at any rate.

Mr. W. A. Passmore spoke quietly in terms of the action of the council very arbitrary in refusing to apply for legislation when so requested by a large petition.

Mr. McIntyre was more severe in his arraignment of the city fathers. He digressed in the course of his remarks to pointing out what seemed to him suspicious actions on the part of the officials in dealing with civic matters. He contended that the people were not taken into confidence of the council on many questions of public import. He thought amalgamation with Edmonton highly to be desired from the viewpoint of the Strathcona ratepayer.

Ald. Bush Warned Up
Ald. Bush took up the remarks of Mr. McIntyre with a great deal of warmth. He said that all things had been conducted openly by the council of the last three years at least and in making certain statements Mr. McIntyre was not acting the part of a gentleman and moreover asserting things not in keeping with facts. He felt sure all members of the council had the interest of the city at heart and

would do nothing which could reflect against the prosperity of the municipality. The cross firing becoming rather warm Mr. Palmer said the only thing the deputation came to discuss was the particular character of the amendment and he asked further regarding it. He understood that it was now read for the first time to the House. Ald. Bush explained that even though it was necessary to have introduced into the legislative business at this early date it was not too late to consider amendments and as a matter of fact the committee intend finding the measure into further consideration at the next meeting of the council when the bill will be put in shape for the second and third readings.

J. H. McDonald felt that even with nearly 200 names attached to the petition calling for amalgamation legislation this number of signers could not really be called representatives. He thought the movers had gone the wrong way about the matter, in really putting the cart before the horse. The matter should have been brought first before the ratepayers before submission to the Legislature. The discussion came to an end with a lively little altercation between Ald. Calder and Mr. Daly.

Regular Business

Only a few unimportant communications were on hand. Accounts to the amount of \$1350.16 were ordered paid.

The bringing up of the Sunday car by-law question in answer to a petition presented one week before due brought first before the ratepayers before submission to the Legislature. The discussion came to an end with a lively little altercation between Ald. Calder and Mr. Daly.

The city engineer presented a report on the construction of cement sewers in the city during the past season. A report from the Board of Health recommended the installations of water and sewer connection with all property possible at an early date. The appointment of a new scavenger was announced.

Want Better Brakes Used
Ald. Calder raised the question of unsafe brakes being used on the inter-urban cars which he feels do not properly safeguard human lives on the heavy grades on this side of the river. Only hand brakes are used on these cars although air brakes are installed on the cars operating on the level in the Capital. He felt that the matter was not to be dealt with lightly. Ald. Condon thought the service on the inter-urban line should be kept at the 20-minute schedule instead of the half hour as at present. A committee was appointed some months ago to com-

fer with Edmonton in respect to some of these matters and this body was authorized to get information and report at the next regular council meeting with the city engineer added as a member.

Ald. Condon wanted to know when the fire hall bell would again be rung daily. He thought the present condition disgraceful as the bell was found to be peculiarly valuable to employers of labor, who, in the absence of

the once familiar ringing, now feel their men start work with the last whistle and quit with the first. Council adjourned at 10:15 to meet again next Thursday evening as a committee of the whole to deal with the charter amendments.

Next Sunday Comrade Chair of Calgary will address the Socialists of this city at the Le Grande theatre.

ABOUT TOWN.

The monthly dance of the Caledonian Society will be held this evening at eight o'clock.

The Y. M. C. A. Debating Club will begin their year's work, by a formal opening, this evening, at which J. V. Ward will give an address on the "Investment of Personality."

The Irish Association held their regular monthly meeting this evening at which the first number of the Irish magazine recently started by the society was read with a special contribution by T. P. O'Connor.

The Humane Society Ladies will give a ball in the Separable School Hall, Friday evening, Nov. 25th. Tickets are on sale at the drug stores of Mr. Lines and Mr. Archibald and at the corner of the hall.

Installation of officers will be held at Newwood Lodge No. 41, I.O.O.F. Monday, Nov. 28th. All members are requested to be present.

The appeal of J. J. Creighton of Edmonton from conviction in the Tuckey v. the R. N. W. M. P. at Edmonton on Sept. 22nd was heard and was allowed by Judge Taylor in District Court this morning.

Evans vs. Evans occupied this morning's session of the Supreme Court. The evidence will be concluded this afternoon.

A smoking concert and open meeting was held last Friday evening by the Black Watch Camp No. 204. Sons of Scotland, at the Separate School Hall. An excellent program of songs, recitations, music and Highland dancing was provided, and a most pleasant evening was spent.

CANON TUCKER SPEAKS

Rev. Canon Tucker presented the needs and hopes of the Laymen's Missionary Movement, before a large audience in All Saints' Church School room last evening. The speaker dwelt on the expenditures made every year, on pleasure by the wealthy or well-to-do among English-speaking peoples. He drew a sketch of the fast-moving history of the scheme for evangelizing the world, told of the present needs and concluded by laying the responsibility of the movement on the laymen themselves, whose business ability could best finance and organize this world-wide propaganda.

DAVIES MAY RUN

Maye Be Candidate In Strathcona's Mayoralty Contest.

Ex-Mayor Arthur Davies, of Strathcona, who occupied the chief municipal chair of the sister city in 1903 will again be a candidate for the office next year. Mr. Davies has been a resident of Strathcona for many years and has a dearth of majority aspirants and Mr. Davies is the only candidate in the field as yet, although Mayor Daughan has recently announced his intentions. However, since he has already served for two and a half years, it is not likely that he will be seen in the contest this time.

Mr. Davies is in favor of civic union, and is recognized to be efficient to represent Strathcona in the negotiations with the Dominion government. Ald. Bash, who has also been mentioned as a candidate has not yet announced whether he will be in the field.

BENNETT WILL PROBE

(Continued from page one)

That the right to control and manage the internal resources of the province would be no more assured to the class which he represents than the retention of the administration resources by the Dominion government, was the opinion of C. M. O'Brien, the Socialist member who spoke at the meeting of the Strathcona branch of the Dominion government in the legislature yesterday afternoon.

Mr. Patterson, also spoke on the resolution and the question of this speech, Mr. Bramley-More offered to withdraw the resolution on the premier's suggestion.

At a meeting of the Board of Health a report was received from the Medical Health Officer in which the following recommendations were made by him. First—That a Sanitary Inspector should have no other duties than to look after the health of the city.

Secondly—That the municipal health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Thirdly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Fourthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Fifthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Sixthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Seventhly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Eighthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Ninthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Propose Change of Plans for Approach to Bridge on "Scoti" Side.

NEWS OF STRATHCONA

Compulsory Sewage Connections

Are Advocated by the Board of Health.

(By Our Own Reporter)

Strathcona, Nov. 24.—Since the outbreak of typhoid in the city last fall the Board of Health have taken up the sanitation question with renewed energy and the result of their deliberations was made known to the council in a report last week. Acting on the recommendation of the medical health officer they would advise that in thickly settled portions of the city it be made compulsory for property holders along water and sewerage lines to get connections with the system installed. While this may look to be a drastic proposition it appears to be necessary from the survey of present conditions. It was also recommended that a sanitary inspector be appointed to give his entire time to the work. This was done in the city two years ago but during the past twelve months the sanitary duties have been shouldered upon the police department.

The report as presented to the council reads:

"At a meeting of the Board of Health a report was received from the Medical Health Officer in which the following recommendations were made by him. First—That a Sanitary Inspector should have no other duties than to look after the health of the city."

Secondly—That the municipal health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Thirdly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Fourthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Fifthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Sixthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Seventhly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Eighthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Ninthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Tenthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Eleventhly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Twelfthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Thirteenthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Fourteenthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Fifteenthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Sixteenthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Seventeenthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Thirty-secondly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Thirty-thirdly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Thirty-fourthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Thirty-fifthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Thirty-sixthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Thirty-seventhly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Thirty-eighthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Thirty-ninthly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

Fortiethly—That the health officer should be a city engineer, with the water and sewerage system to pay not less than \$2000 a year.

LABOR DELEGATES TALK TO PREMIER

Premier Sifton was interviewed yesterday by a labor delegation, including Geo. Howell, secretary of the Sifton, the Attorney-General, Hon. C. R. Mitchell, Mayor Jamieson and R. B. Bennett of Calgary.

The plan of the full operation showing the different products in the various stages of making and ought to be of very special interest to the industry is one which uses for its raw material, a natural resource of the country.

The plant is the biggest of its kind in Canada at the present time and second largest to any on the North American continent. It has a capacity of handling 600 tons of raw material per day. The building has a floor space of over 1,000,000 square feet, being 35 stories in height and built of brick manufactured on the ground. It is heated by over 1,000,000 cubic feet of steam piping and lighted by five hundred and thirty-five 35 candle power electric lights.
